THE NEW ZEALAND MERINO COMPANY LIMITED DIRECTORS' STATEMENT

The Directors are responsible for preparing the financial statements and ensuring that they comply with New Zealand Generally Accepted Accounting Practice and fairly represent the financial position of The New Zealand Merino Company Limited as at 30 June 2025 and the results of the operations and cash flows of the Company for the year ended on that date.

The Directors consider that the financial statements of the Company have been prepared using appropriate accounting policies, which have been consistently applied and supported by reasonable judgements and estimates and that all relevant financial reporting and accounting standards have been followed.

The Directors believe that proper accounting records have been kept which enable, with reasonable accuracy, the determination of the financial position and financial performance of the Company and facilitate compliance of the financial statements with the Financial Markets Conduct Act 2013.

The Directors consider that they have taken adequate steps to safeguard the assets of the Company and to prevent and detect fraud and other irregularities. Internal control procedures are also considered to be sufficient to provide a reasonable assurance as to the integrity and reliability of the financial statements.

The Directors are pleased to present the financial statements for The New Zealand Merino Company Limited for the year ended 30 June 2025.

Reporting Entity

The financial statements presented are those of The New Zealand Merino Company Limited (the "Company").

The prior year financial statements (2024) were consolidated financial statements, including The New Zealand Merino Company Limited and Made For Good RX Limited (100% owned subsidiary). The New Zealand Merino Company Limited and Made For Good RX Limited were amalgamated on 31 May 2025 and as such the current year financial statements represent The New Zealand Merino Company Limited financial statements only. The Amalgamation was undertaken using the pooling of interests method as Made For Good RX Limited was under common control.

The New Zealand Merino Company Limited is a company domiciled in New Zealand and is registered under the Companies Act 1993, and listed on the Unlisted Securities Exchange.

The New Zealand Merino Company Limited is a FMC reporting entity under the Financial Market Conducts Act 2013.

The nature of the operations of the business is wool marketing and sales.

Basis of Preparation

The financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice (NZ GAAP). They comply with the New Zealand equivalents to International Financial Reporting Standards (NZ IFRS) and other applicable Financial Reporting Standards as appropriate to profit-oriented entities. The financial statements also comply with International Financial Reporting Standards (IFRS).

Representation of Comparatives

Where applicable, certain comparatives have been restated to comply with the accounting presentation adopted in the current year to ensure consistency with the current year classification. Areas of restatement include:

- The Statement of Comprehensive Income - marketing contributions have been reclassified from other income to revenue due to the arrangements with supply chain partners being formalised into contractual arrangements. This confirmed that the marketing contributions are revenues from contracts with customers. Marketing contributions are detailed as a separate revenue stream within total revenue. Refer to note 1 for amounts re-presented.

Basis of Consolidation

The financial statements of The New Zealand Merino Company Limited are the results of the Company and the results of its associates which are accounted for using the equity method. At 30 June 2025 the Company has no subsidiaries.

Subsidiaries are entities over which the Company has control. Control is achieved when the Company:

- has power over the entity;
- is exposed to, or has right to, variable returns from its involvement with the entity; and
- can use its power to affect returns.

Measurement Base

The financial statements are prepared on a historical cost basis, except for derivative financial instruments, which have been measured at fair value, and inventory which has been measured at the lower of cost and net realisable value.

The financial statements are prepared on a going concern basis.

Presentation Currency

These financial statements are presented in New Zealand dollars, which is the Company's functional currency. All financial information presented in New Zealand dollars has been rounded to the nearest thousand, except when otherwise indicated.

Critical Judgements in Applying Accounting Policies

In the process of applying the Company's accounting policies management is required to make judgements, estimates and assumptions about the carrying value of assets and liabilities that are not readily apparent from direct sources. The estimates and associated assumptions are based on historical experiences and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

In particular, information about significant areas of estimation, uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in the following accounting policies and notes:

- Goodwill impairment assessment. Refer to policy (f) and Note 12.

Accounting Policies

Changes in Accounting Policies

New Standards and Interpretations Not Yet Adopted

There are no new standards or amendments to existing standards that are effective for the year ended 30 June 2025 that have a material effect on the financial statements of the Company. There were also no standards, except for NZ IFRS 18 Presentation and Disclosure in Financial Statements ("NZ IFRS 18") which were issued but not yet effective that could have a material effect on the Company.

NZ IFRS 18

NZ IFRS 18 was issued in May 2024 as a replacement for NZ IAS 1 Presentation of Financial Statements ("NZ IAS 1") and applies to annual reporting periods beginning on or after 1 January 2027. An initial impact assessment has been performed which indicates there would be no material changes to the amounts in the statement of comprehensive income and new sub-totals introduced. NZ IFRS 18 primarily introduces the following:

- a defined structure for the statement of comprehensive income by classifying items into one of the five categories: operating, investing, financing, income taxes, and discontinued operations. Entities will also present expenses in the operating category by nature, function, or a mix of both, based on facts and circumstances, and
- disclosure of management-defined performance measures in a single note together with reconciliation requirements, and
- additional guidance on aggregation and disaggregation principles (applied to all primary financial statements and notes).

Material Accounting Policies

The following specific accounting policies, which materially affect the measurement of the Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Equity and Statement of Cash Flows, have been applied in these financial statements:

(a) Property, Plant and Equipment

Items of property, plant and equipment are measured at cost, less accumulated depreciation and accumulated impairment losses. Work in progress is measured at cost, net of accumulated impairment losses.

Where an item of property, plant or equipment is disposed of, the gain or loss recognised in the Statement of Comprehensive Income is calculated as the difference between the net sale price and the carrying amount of the asset.

Subsequent Costs

Subsequent costs are added to the carrying amount of an item of property, plant and equipment when that cost is incurred if it is probable that the future economic benefits embodied within the item will flow to the Company and the cost of the item can be measured reliably. All other costs are recognised in the Statement of Comprehensive Income as an expense when incurred.

Depreciation

Depreciation on property, plant and equipment is calculated on a straight-line basis to allocate the cost of an asset, less any residual value, over its useful life. Depreciation is charged to the Statement of Comprehensive Income.

The estimated useful lives of property, plant and equipment are as follows:

Office equipment 2-14 years Leasehold improvements 5-14 years Information technology assets 2-5 years Plant and equipment 2-14 years

The residual value of assets is reassessed annually. Depreciation methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

Capital expenditure that has been incurred for property, plant and equipment and is not yet available for use is classified as work in progress. Work in progress is not depreciated. The total cost of this work is transferred to the relevant asset category on the completion of the project and then depreciated.

(b) Goodwill

Goodwill arising on acquisition represents the excess of the purchase consideration over the fair value of the identifiable net assets acquired.

For the purpose of impairment testing, goodwill is allocated to the cash-generating units (CGU) that are expected to benefit from the acquisition in which goodwill arose. Where the recoverable value of the CGU is less than the carrying amount of the CGU an impairment loss is recognised in the profit and loss and it is not subsequently reversed.

Goodwill is tested for impairment annually and is carried at cost less accumulated impairment losses, if any.

(c) Intangible Assets

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

An intangible asset is derecognised upon disposal (at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss.

Software is stated at cost and amortised to profit or loss on a straight line basis over the useful life applicable to the software.

The residual value of intangible assets is reassessed annually. Amortisation methods, useful lives and residual values are reviewed at each financial year end and adjusted if appropriate.

Capital expenditure that has been incurred for intangible assets and is not yet available for use is classified as work in progress. Work in progress is not amortised but is tested annually for impairment. The total cost of this work is transferred to the relevant asset category on the completion of the project and then amortised.

(d) Trade and Other Receivables

Trade and other receivables are measured at amortised cost less any impairment losses. The Company uses the expected credit loss model for trade receivable assets not held at fair value through profit or loss. For trade receivables, the Company applies the simplified approach in calculating life time expected credit losses with adjustments based on historical credit loss experience and adjusted for forward-looking factors specific to the debtors and the economic environment.

Collectability of trade and other receivables is reviewed on an ongoing basis.

Individual debts that are known to be uncollectable are written off when identified. Refer to Note (g) for the impairment policy.

(e) Inventories

All inventories of wool are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price less costs to sell in the ordinary course of business.

Cost is based on actual cost for all wool purchased and includes expenditure incurred in acquiring the inventories and bringing them to their existing condition and location.

(f) Impairment

Intangible assets and items of property, plant and equipment are tested for impairment by comparing the estimated recoverable amount with the carrying amount.

Recoverable amount is the higher of an asset's fair value less costs to sell, and value-in-use. An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses directly reduce the carrying amount of assets and are recognised in profit or loss.

(g) Share Capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Earnings per share

Basic and diluted earnings per shares (EPS) are presented for ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to shareholders by the weighted average number of shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to shareholders and the number of shares outstanding to include the effects of all potential dilutive shares.

(h) Employee Entitlements

Employee entitlements related to salaries and wages and annual leave are recognised when they accrue to employees. In determining the estimated liability for employee entitlements, any entitlements due at balance date are recorded as a current liability.

(i) Provisions

A provision is recognised when the Company has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market rates and, where appropriate, the risks specific to the liability.

(j) Trade and Other Payables

Trade and other payables are stated at amortised cost.

(k) Revenue

The Company recognises revenue from the following major sources:

- Contract and Auction Sales
- Wool Fees and Charges
- Marketing Contributions

Revenue is measured based on the transaction price allocated to the performance condition within the contract. The Company recognises revenue in the following way:

Contract and Auction sales

Revenue is recognised in profit or loss when control has been transferred to the buyer. This represents the point in time at which the Company satisfies its performance obligation to release the wool and the right to consideration becomes unconditional. There are no rights of return or warranties in regards to the sale of wool. The Company is a principal in regards to all sale of wool transactions due to the level of control during the transaction. The Company determines the best sales mechanism for the wool. Sale via contract or offers to the supply chain is the preferred mechanism, with surplus wool being sold via auction where the wool does not meet contract specifications. Only select wool sales incur insurance and freight, the Company is an agent in regards to insurance and freight.

Wool Fees and Charges

Wool fees and charges revenue is recognised in profit or loss at the same time as the purchase of wool from suppliers or sale of wool to customers. This represents the point in time at which the Company satisfies its performance obligation to transact the wool and the right to consideration becomes unconditional.

Marketing Contributions

For certain agreements marketing contributions are recognised in profit or loss at the point in time that the performance obligations have been met and there is no constraint on the variable contribution. For other agreements, the ability to estimate the variable consideration is constrained due to the Company not having sufficient knowledge of the tops price and, in some instances, the volume of wool. Due to this constraint the revenue is only recognised once it is considered highly probable that a significant reversal to the recognised consideration will not occur.

(I) Other Income

External funding

External funding through government grants and other external parties is recognised when there is reasonable assurance that the entity will comply with the conditions attached and the funding will be received. Other external funding which compensates the Company for expenses incurred is recognised in profit or loss as other income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When external funding relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

Management fees are recognised in profit or loss at the point in time that the services for management have been provided.

(m) Leases

The Company assesses whether a contract is, or contains, a lease at inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

Lease Liabilities

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the Company's incremental borrowing rate when the rate implicit in the lease is not easily determinable.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability and by reducing the carrying amount to reflect the lease payments. The lease liability is remeasured whenever there is a change in the lease term or a change in the lease payment.

Right-of-Use Lease Assets

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities.

Lease periods for leased assets are based on the lease terms and an assessment of renewal options:

Buildings 3 - 14 years
Motor vehicles 3 years
Office equipment 3 - 4 years

(n) Finance Expenses and Income

Finance income comprises interest income which is recognised as it accrues using the effective interest method. Finance expenses comprise interest expense on borrowings and lease interest. All borrowing costs are recognised in profit or loss using the effective interest method.

(o) Foreign Currency Transactions

Transactions denominated in foreign currency are translated into New Zealand currency at the spot exchange rate. Amounts receivable and payable in a foreign currency at balance date are translated at the exchange rate at that date. Foreign exchange differences arising on their translation are recognised in profit or loss.

(p) Derivative Financial Instruments

The Company uses foreign exchange contracts to hedge its exposure to foreign exchange risks arising from future sales or purchases of goods in foreign currencies. The Company uses wool futures contracts to hedge its exposure to price risks arising from future sales or purchases of wool.

In accordance with the treasury policy, the Company does not hold or issue derivative financial instruments for trading purposes, however derivatives that do not qualify for hedge accounting are accounted for as trading instruments with their fair value recognised through profit or loss.

Cash Flow Hedges

The Company designates certain derivatives as cash flow hedging instruments in respect of foreign currency risk and wool price risk.

At the inception of the hedge relationship the Company's documents the relationship between the hedging instrument and the hedged item, along with the risk management objectives and strategy for undertaking various hedge transactions. On an on-going basis the Company documents whether the hedging instrument is effective in offsetting the changes in fair value of the hedged item attributable to the hedged risk, which is when the hedging relationships meet all of the following hedge effectiveness requirements:

- there is an economic relationship between the hedged item and the hedging instrument;
- the effect of credit risk is not greater than the value changes that result from the economic relationship; and
- the hedge ratio of the hedging relationship is the same as the hedge ratio resulting from the actual quantity of the hedged item and the actual quantity of the hedging instrument.

Sources of hedge ineffectiveness include; credit value adjustments to the hedge instrument, shortfalls in the amount of the expected exposure, and changes in the transaction timing.

The Company designates the full change in the fair value of forward contracts and futures contracts as the hedging instrument for all its hedging relationships involving forward contracts and futures contracts.

Foreign exchange contracts and wool futures contracts are recognised in the Statement of Financial Position at their fair value. Transaction costs are expensed immediately. Where the foreign exchange contracts or wool futures contracts are designated as a hedge, the effective portion of the changes in the fair value of the instrument are initially recognised in the Cash Flow Hedge Reserve, and subsequently transferred to the Statement of Comprehensive Income at the point at which the sale and associated debtor are recorded. As soon as the contract is known to be ineffective, the ineffective portion of the foreign exchange contracts or wool futures contracts is recognised immediately in profit or loss.

If the Company discontinues hedge accounting for a cash flow hedge the amount accumulated in the cash flow hedge reserve is accounted for as follows:

- The amount remains in other comprehensive income if the future cash flows are still expected to occur, or
- The amount is immediately reclassified to profit or loss as a reclassification adjustment if the future cash flows are no longer expected to occur.

(q) Income Tax

Income tax expense comprises current and deferred tax. Income tax expense is recognised in profit or loss, except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised using the balance sheet method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes, and the amounts used for taxation purposes.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted, or substantively enacted, by the reporting date.

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profits will be available against which the unused tax losses can be utilised.

(r) Goods and Services Tax

All amounts are shown exclusive of Goods and Services Tax (GST), except for receivables and payables that are stated inclusive of GST.

(s) Treasury Stock

Treasury Stock is the portion of shares that the Company keeps in its own treasury. Treasury Stock arises from a buy-back from shareholders. These shares do not receive dividends, have no voting rights and are not included in shares outstanding calculations.

(t) Cash and Cash Equivalents

Cash and cash equivalents in the Statement of Financial Position comprise cash on hand and short term deposits with an original maturity of three months or less. These are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value. Cash and cash equivalents is net of outstanding bank overdrafts as these are considered an integral part of the Company's cash management.

(u) Research & Development

All research expenditure is recognised in profit or loss as incurred.

Development expenditure which is directly attributable to the design, testing, and implementation of identifiable and unique intangible products controlled by the Company and which meet the recognition criteria are recognised as intangible assets. Where development expenditure has been recognised as an intangible asset it is stated at cost and amortised on a straight-line basis over the period of expected benefits. Amortisation begins at the date of recognition of the intangible asset, excluding capital work-in-progress. All other development expenditure is recognised in profit or loss as incurred.

(v) Share Based Arrangements

Equity-settled share-based arrangements with employees of the Company and others providing similar services are measured at the fair value of the equity instruments at the grant date. The fair value determined at grant date of the equity-settled share based arrangements is expensed over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to equity.

For cash-settled share-based arrangements, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. The fair value determined at grant date of the cash-settled share based arrangement is expensed over the vesting period. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year. The Company recognises any reduction in the fair value of cash-settled share based arrangements through profit or loss.

(w) Statement of Cash Flows

The Statement of Cash Flows is prepared exclusive of Goods and Services Tax (GST). Operating activities represent all transactions and other events that are not investing or financing activities. Investing activities are those activities relating to the acquisition and disposal of investments and any other property, plant and equipment. Financing activities are those activities relating to changes in the equity and debt capital structure of the Company and those activities relating to the cost of servicing the Company's equity capital.

(x) Subsidiaries

Acquisitions of subsidiaries are accounted for using the acquisition method. The cost of the acquisition is measured at fair value, which is calculated as the sum of the assets given, liabilities incurred or assumed, and equity instruments issued by the Company, at acquisition date, in exchange for control of the acquiree.

Acquisition related costs are recognised in profit or loss as incurred. The results of subsidiaries acquired or disposed of during the year are included in profit or loss from the date of acquisition or up to the date of disposal as appropriate.

(y) Investments in Joint Ventures

A joint venture is an arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

The Company accounts for investments in joint ventures using the equity method of accounting. All investments in joint ventures are initially recognised in the Statement of Financial Position at cost and subsequently increased or decreased to recognise the Company's share of profit or loss.

The investments in joint ventures share of profit or loss is recognised in profit or loss.

(z) Segment Reporting

An operating segment is a component of an entity that engages in business activities from which it may earn revenue and incur expenses. A segment's operating results are regularly reviewed by management to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. The Company currently operates as one reportable segment and discrete financial information is not provided on a geographical or product basis. The operating results are reviewed at a Company level.

1 REVENUE

The Company derives revenue as a principal in the following major product lines.

2024		2025
2024 \$000		2025 \$000
\$000	Contract revenue	\$000
60,409	Fine wool	61,685

Working Capital Facility

During the year the Company maintained an overdraft facility of up to (\$000) \$3,000 (2024: \$3,000). At balance date the Company is not utilising the overdraft facility (2024: nil) and has (\$000) \$3,000 of undrawn overdraft facility available (2024: \$3,000). The Company also holds cash surpluses in foreign currency accounts. The Company has a Business Visa limit of (\$000) \$500 (2024: \$500).

The facilities were secured by a General Security Agreement over the assets and undertakings of The New Zealand Merino Company Limited.

7 TRADE AND OTHER RECEIVABLES

2024 \$000		2025 \$000
15,153	Trade receivables	8,444
1,178	Prepayments	990
16,331		9,434

The company's trade receivables are amounts due from customers for goods and service performed in the ordinary course of business. Normal terms of trade for Auction receivables are 11 days after date of the Auction, and for Contract revenue a number of forward dates are in place to align with customers supply chain requirements. All trade receivables other than Auction and Contract revenue are due 20th of the following month of the invoice. The value of foreign currency denominated trade and other receivables is as follows (\$000) AUD \$1,532 (NZD \$1,662), USD \$106 (NZD \$175) (2024: AUD: \$1,727 (NZD \$1,878), USD \$454 (NZD: \$689).

The Company uses the expected credit loss model to determine impairment of trade receivables. The model is based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general conditions, and an assessment of both the current as well as the forecast conditions at the reporting date. As at 30 June 2025 there is no impairment within trade receivables (\$000) Nil (2024: \$203). The provision provided in 2024 was partially released during 2025. The amount released was (\$000) \$160, with the remainer of the provisioned debt written off.

Included in trade receivables are debtors which are past due at balance date, as payment has not been received, and for which no provision has been made as there has not been a significant change in credit quality and the amounts are considered to be fully recoverable.

8 INVENTORIES

2024		2025
\$000		\$000
15.972	Stock of wool	10,322
13,372	Stock of Wool	10,322

The cost of inventories recognised as an expense during the year in respect of continuing operations was (\$000) \$108,444 (2024: \$114,046).

The cost of inventories recognised as an expense includes (\$000) \$614 (2024: \$623) in respect of write-downs of inventory to net realisable value.

Stock on hand as at 30 June 2025 with an age of greater than one year is (\$000) \$1,336 (2024: \$833).

11 INVESTMENTS IN OTHER ENTITIES

(i) Joint ventures

A joint venture is an arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement.

Alpine Origin Merino Limited (AOML)

AOML is jointly owned by The New Zealand Merino Company Limited (50%), and Alliance Group Limited (50%) and is incorporated in New Zealand. AOML is focused on the marketing of fine wool sheep meat. AOML's place of business is in New Zealand.

The Company's share of profits in AOML has been previously equity accounted for. AOML has undertaken no direct transactions during the year, with all transactions undertaken by Alliance Group Limited. There are no unrecognised accumulated losses within AOML as at 30 June 2025 (2024: nil). The Company ceased equity accounting in 2018. The carrying amount of AOML was reduced to zero due to share of losses in prior years and no direct activity in the period. There is no share of profit or losses for the year ended 30 June 2025 (2024: nil).

Glerups New Zealand Limited (GNZL)

On 2 December 2024 the Company sold its shares in GNZL to Aktieselskabet Glerups.dk ApS at book value.

Goodwill arises due to the acquisition of the assets and business of NZM Disestablishment Limited.

Goodwill has been assessed for impairment by discounting the cash flows expected to occur over five years (including terminal value) in the cash generating unit to which the goodwill is allocated (being the Company) at a pre-tax WACC of 13.1% (2024: 12.3%) and a terminal growth rate of 3% (2024: 3%). The analysis is sensitive to the revenue growth rate, terminal growth rate, and discount rate. A reduction of 0.5% in the terminal growth rate and 0.5% change in the discount rate do not result in an impairment.

Trademarks are amortised over the life applicable to each trademark. The life of all current trademarks is 10 years.

Computer software is amortised over the useful life of the applicable software. The assessed useful life of computer software ranges from 2 to 10 years (2024: 2-5 years). All additions to computer software have been separately acquired from external providers.

13 TRADE AND OTHER PAYABLES

14 TRADE FINANCE FACILITY

2024 \$000		2025 \$000
	Movement in trade finance facility	
14,500	Opening balance	10,000
30,300	Proceeds from trade finance facility	89,500
(34,800)	Repayments to trade finance facility	(99,500)
10,000	Closing balance	

The Company has entered into a trade finance agreement with ASB Bank Limited to meet operational cash flow requirements throughout the year. As at 30 June 2025 the Company had available (\$000) \$2,500 of trade finance facility, and had drawn \$0, resulting in undrawn trade finance facility of \$2,500 (2024: \$12,000 of facility, with \$10,000 drawn, \$2,000 of undrawn facility). The trade finance facility is renegotiated each year and monthly trade finance facility limits are set, the next renegotiation of the trade finance facility is before 30 June 2026.

Interest is payable on the trade finance facility. The floating interest rate at 30 June 2025 is 5.41% (2024: 7.16%).

The trade finance facility is secured under the terms of the Combined Trade Finance Facility Agreement dated 2 October 2020.

The Company is subject to capital requirements imposed by ASB Bank Limited through covenants agreed as part of the trade finance facility agreement. The Company met all capital requirements for the year ended 30 June 2025. During the year ended 30 June 2024 the Company obtained a waiver for the interest cover ratio.

The following summarises the key covenants:

- Shareholders funds, total tangible assets less total liabilities, of the Company must not be less than (\$000) \$8,000 on any date, tested annually on the last day of the financial year,
- Interest cover ratio, EBITDA (after adding back non-recurring items) to total interest costs, is not less than 2.5 times, tested annually on the last day of the financial year; and
- Stock and debtor cover ratio, total stock and debtors (excluding any stock and inventory held in the bonded warehouse in China) to working capital debt and creditors, is not less than 1.2 times, tested monthly.

15 FINANCIAL INSTRUMENTS

Fair value estimation

The table below analyses financial instruments carried at fair value, by the level of fair value hierarchy. The different levels have been defined as follows:

- (i) Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- (ii) Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- (iii) Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3). Refer to Note 11 (ii) Other interests.

The following table presents the Company's assets and liabilities that are measured at fair value.

2025 \$000	Level 1	Level 2	Level 3	Total balance
Assets Investments in other entities Derivative financial instruments Total Assets	- - -	1,151 1,151	44 	44 1,151 1,195
Liabilities Derivative financial instruments Total Liabilities		151 151		151 151
2024 \$000				
Assets Investments in other entities Derivative financial instruments Total Assets	- - -	549 549	44	44 549 593
Liabilities Derivative financial instruments Total Liabilities		878 878		878 878

15 FINANCIAL INSTRUMENTS (continued)

The net nominal value of forward currency contracts (cash flow hedges) outstanding at balance date was (\$000) \$50,940 (2024: \$43,060). The net nominal value of wool futures (cash flow hedges) outstanding at balance date was (\$000) \$1,038 (2024: \$1,904).

Future cash flows of forward currency contracts are based on bank derived mark to market valuations. Future cash flows of wool futures contracts are based on the exchange quoted forward prices which are not an active market and classified under Level 2 as defined in the fair value hierarchy.

Financial risk and capital management

The Company's capital includes share capital, reserves, and retained earnings.

When managing capital, the Company's objective is to ensure the Company continues as a going concern as well as to maintain optimal returns to shareholders and benefits for other stakeholders.

The Company reviews its capital structure on a regular basis. As the market changes the Company may change the amount of dividends to be paid to shareholders, return capital to shareholders, or issue new shares.

The New Zealand Merino Company Limited's shares are listed on the Unlisted Securities Exchange. During the year the Company did not complete any share issues or share buy-backs.

The Company did not pay a dividend during the year ended 30 June 2025 (\$000) (2024: \$0.00).

At 30 June 2025 the Company could utilise an overdraft facility of up to (\$000) \$3,000 (2024: \$3,000) and a trade finance facility of up to (\$000) \$2,500 (2024: \$12,000) with ASB Bank Limited. At 30 June 2025 the Company is not utilising the overdraft facility and is utilising (\$000) \$0 (2024: \$10,000) of the trade finance facility. The Company also hold cash surpluses in foreign currency accounts. The Company has obtained a trade finance facility and an overdraft facility to cover its cash flow requirements for the 2026 financial year.

The Company is not subject to any externally imposed capital requirements, other than the covenants required under its borrowing agreements. During the year there were no breaches of these covenants.

The Company does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes. The use of financial derivatives is governed by the Company's policies approved by the Board of Directors, which provide written principles on the use of derivative financial instruments.

Material accounting policies

Details of the material accounting policies and methods adopted, including the criteria for recognition, and the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset and financial liability, are included in the Statement of Accounting Policies.

15 FINANCIAL INSTRUMENTS (continued)

(i) Wool price risk

Wool price risk is the risk of a loss to the Company from adverse movements in wool prices where the Company has open sales contract positions.

The Company has entered into wool futures contracts to reduce the impact of spot market price changes on open sales contracts positions.

The average exchange quoted forward price for wool futures at 30 June 2025 is \$17.10 per kilogram (2024: \$16.46). The total kilograms contracted at 30 June 2025 is 64,000 kilograms (2024: 115,000).

A sensitivity analysis has been conducted on the exchange quoted forward wool price. A 3% increase in the exchange quoted forward wool price would increase the fair value, and total comprehensive income by (\$000) \$33 (2024: \$55) with no effect on profit / (loss) after tax. A 3% decrease in the exchange quoted forward wool price would decrease the fair value, and total comprehensive income by (\$000) \$30 (2024: \$58) with no effect on profit / (loss) after tax.

The following table details the notional principal amounts, fair value and remaining terms of wool futures contracts outstanding as at 30 June 2025:

	2024 \$000	2024 \$000	2025 \$000	2025 \$000
	Notional principal amount	Fair value	Notional principal amount	Fair value
Not later than 1 month	165	(8)	79	5
30-90 days	828	(31)	389	(2)
91-365 days	647	32	570	22
1 year to 5 years	264	(7)		(0)
	1,904	(14)	1,038	25

The fair value of wool futures contracts has been included in the Statement of Financial Position as current and non current assets and current and non current liabilities, based on the time to maturity and position the wool futures contract is in as at 30 June 2025. The cashflows for settlement of wool futures are based on the fair value amount.

(ii) Currency risk

Currency risk is the risk of a loss to the Company arising from adverse fluctuations in exchange rates.

The Company has exposure to foreign exchange risk as a result of transactions denominated in foreign currencies, arising from normal trading activities. Where exposures are certain, it is the Company's policy to hedge these amounts as they arise.

The Company is exposed to the currency of Australia (AUD), the United States of America (USD), China (CNY), Europe (EUR) and Japan (JPY). A 1% increase in the contract close out rates would increase the fair value, and total comprehensive income by (\$000) \$504 (2024: \$426) with no effect on profit / (loss) after tax. A 1% decrease in the contract close out rates would decrease the fair value, and total comprehensive income by (\$000) \$515 (2024: \$435) with no effect on profit / (loss) after tax.

15 FINANCIAL INSTRUMENTS (continued)

(ii) Currency risk (continued)

At 30 June 2025 the average market rate for AUD foreign exchange contracts is 0.9190 (2024: 0.9144), the average market rate for USD foreign exchange contracts is 0.6008 (2024: 0.6166), the average market rate for EUR foreign exchange contracts is 0.5207 (2024: 0.5540), the average rate for JPY foreign exchange contracts is 0 (2024: 89.19) and the average rate for CNY foreign exchange contracts is 4.242 (2024: 4.283).

The following table details the notional principal amounts, fair values and remaining terms of any forward currency contracts outstanding as at the reporting date:

The fair value of foreign currency contracts has been included in the Statement of Financial Position as current and non current assets and current and non current liablities, based on the time to maturity and position the foreign currency contract is in as at 30 June 2025.

15 FINANCIAL INSTRUMENTS (continued)

(iii) Credit risk

Credit risk is the risk that a counterparty will default on its obligations, resulting in a financial loss to the Company. Financial assets, which potentially subject the Company to concentration of credit risk, consist principally of cash, bank balances, and trade receivables. The Company's cash equivalents are placed with high credit quality financial institutions.

The Company has adopted a policy of only dealing with creditworthy counterparties and, in the case of trade receivables, for the most part only releasing wool for delivery once it has been paid for as a means of mitigating the risk of financial loss from defaults. The Company's exposures are continuously monitored. The Company measures credit risk based on the expected credit loss model.

Trade receivables consist of a small number of customers. Approximately 74% of trade receivables are due from three customers (2024: Approximately 65% due from three customers).

The credit risk on forward currency contracts with ASB Bank Limited as at 30 June 2025 is \$974 (2024: nil). The credit risk on wool future contracts with the various counterparties as at 30 June 2025 is \$25 (2024: nil). All counterparties for forward currency contracts are considered to be of a high quality based on credit ratings. All counterparties for wool futures contracts are assessed based on credit reports and considered to be of a good quality.

Total credit risk was comprised as follows:

		2024	2025
		\$000	\$000
Cook		057	2.076
Cash		857	3,876
Trade receivables		15,153	8,444
Derivative financial assets			1,000
Total credit risk	₹	16,010	13,320

Collateral and other credit enhancements obtained

The Company does not hold any collateral as security over trade receivables.

Trade receivables that are either past due or impaired

The table below sets out information regarding the ageing of trade receivables. Debts owing in excess of 30 days past their due date are considered past due. Based on an assessment using the simplified expected credit loss model, no impairment of trade receivables has been recognised.

	2024	2025

	*	

15 FINANCIAL INSTRUMENTS (continued)

(iv) Interest rate risk

Interest rate risk is the risk that the Company may be affected by changes in the general level of interest rates. The Company is exposed to interest rate risk as it borrows funds at floating interest rates. No interest rate swaps have been entered into during the year.

At 30 June 2025 the interest rate on the trade finance facility is 5.41% (2024: 7.15%). The Company has entered into a trade finance facility for 12 months and drawdowns and repays the trade finance facility as required.

At 30 June 2025 the interest rate on the overdraft facility is 6.43% (2024: 8.68%).

At the reporting date the Company had the following interest-bearing financial instruments which are subject to variable floating interest rates:

	2024 \$000	2024 \$000	2025 \$000	2025 \$000
	Principal amount	Fair value	Principal amount	Fair value
Trade finance facility	10,000	10,000	-	=
	10,000	10,000		7

15 FINANCIAL INSTRUMENTS (continued)

(v) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company monitors its liquidity daily, weekly and monthly and maintains appropriate liquid assets and bank funding facilities to meet all obligations in a timely and cost effective manner. Management of liquidity is designed to ensure that the Company has the ability to meet financial obligations as they fall due.

The following contractual maturities tables detail the Company's exposure to liquidity risk:

19 RELATED PARTY DISCLOSURES

Alpine Origin Merino Limited (AOML)

As at 30 June 2025 the Group owns a 50% share in Alpine Origin Merino Limited (AOML) with the other 50% being owned by Alliance Group Limited. During the year the Company did not pay any expenses or receive any income from AOML due to AOML not directly engaging in any operating activities as these were done through Alliance Group Limited (2024: nil). There are no receivable balances with AOML as at 30 June 2025 (2024: nil).

During the year ended 30 June 2025 the Company has recorded expenses of (\$000) \$7 (2024: \$5) and income of (\$000) \$173 (2024: \$60) with Alliance Group Limited. As at 30 June 2025 the receivable from Alliance Group Limited is (\$000) \$2 (2024: 60).

Glerups New Zealand Limited (GNZL)

On 2 December 2024 the Company sold its 50% share in Glerups New Zealand Limited (GNZL). During the year the Company paid expenses of (\$000) \$31 (2024: \$6) to GNZL and received revenue of (\$000) \$177 (2024: \$287) which was a claim for management resources that the Company employed into GNZL. As at 30 June 2025 the receivable from GNZL is (\$000) \$0 (2024: \$312). As at 30 June 2025 the investment in GNZL is (\$000) \$0 (2024: \$59).

Directors

The Company previously entered into transactions for the sale and purchase of wool with associated entities who had significant influence over the Company through their appointment of a director to the Company's board. The Company's only related party through associated entities was AWN Rural Pty Limited which became a related party on 1 March 2023 in relation to the Company's director, John Maher. John Maher became a director on this date and was also a director of AWN Food and Fibre Pty Limited, the parent company of AWN Rural Pty Limited. The appointment of John Maher to the Company's board was independent of his directorship of AWN Food and Fibre Pty Limited. From May 2024 John Maher ceased to be a director of AWN Food and Fibre Pty. Figures in the below table are only representative of the governing period.

The Company entered into transactions for the sale and purchase of wool during the course of the year with associated entities of other directors of the Company, which are not deemed related parties.

The Company has not entered into any transactions other than the payment of directors fees directly with any director.

19 RELATED PARTY DISCLOSURES (continued)

Key Management Personnel

The Company has not entered into any transactions with key management personnel of the business outside of the employment relationship.

Total remuneration provided to key management personnel in 2025 was (\$000) \$3,151 (2024: \$3,505). Key management personnel refers to the Chief Executive Officer and seven (2024: seven) employees who directly reported to the Chief Executive during the year ended 30 June 2025.

In addition to the amount above, a short-term incentive payment of (\$000) \$473 has been accued at 30 June 2025 (2024: (\$000) \$172)

Total remuneration provided to directors in 2025 was (\$000) \$390 (2024: \$397).

20 COMMITMENTS

Capital Commitments

The Company has one capital commitment as at 30 June 2025 of (\$000) \$59 (2024: \$193). This capital commitment is with a third-party supplier in relation to the development and build of new computer software.

In respect of its interest in the Alpine Origin Merino Limited joint venture (refer Note 11), the joint venture had no capital commitments as at 30 June 2025 (2024: nil).

21 LEASES

The Company leases buildings, motor vehicles and office equipment.

The related lease expense for short-term leases is recognised in profit or loss is (\$000) \$104 (2024: \$97).

Information for leases of which the Company is a lessee is presented below:

\$000

Right-of-use asset	Buildings	Motor vehicles	Office equipment	Total
Opening right-of-use asset at 1 July 2023	4,556	218	14	4,788
Depreciation charge for the year	(520)	(166)	(12)	(698)
Additions to right-of-use assets	_	277	66	343
Remeasurement of right-of-use assets	235	=	-	235
Derecognition of right-of-use assets	<u>~</u>	2	(12)	(12)
Closing right-of-use asset at 30 June 2024	4,271	329	56	4,656
Opening right-of-use asset at 1 July 2024	4,271	329	56	4,656

22 EVENTS AFTER BALANCE DATE

There are no significant events post balance date.

23 AUDITOR'S REMUNERATION

The auditor of the Company is Ernst & Young Limited.

Amounts paid or payable to Ernst & Young Limited during the year were:

2024 \$000		2025 \$000
99	Audit of the financial statements Other services:	101
32	People advisory services Taxation services:	7
20	Tax compliance and advisory services	-
151		108

The Company's policy is that to ensure independence the Company auditor should not undertake certain other advisory services to the Company. In 2024 fees were paid to Ernst & Young in relation to taxation services and remuneration advisory services, the taxation services have now been transitioned to another provider.

24 CONTINGENCIES

The Company has no contingent liabilities as at 30 June 2025 (2024: nil). The Company has no contingent assets as at 30 June 2025 (2024: nil).

In respect of its interest in the Alpine Origin Merino Limited joint venture (refer Note 11), the joint venture had no contingent assets or liabilities as at 30 June 2025 (2024: nil).

25 DIVIDEND

The Company did not pay a dividend during the year ended 30 June 2025 (\$000) (2024: \$0).

Independent Auditor's Report to the shareholders of The New Zealand Merino Company Limited

Opinion

We have audited the financial statements of The New Zealand Merino Company Limited (the "Company") on pages 3 to 44, which comprise the statement of financial position of the Company as at 30 June 2025, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended of the Company, and the notes to the financial statements including a summary of material accounting policy information.

In our opinion, the financial statements on pages 3 to 44 present fairly, in all material respects, the financial position of the Company as at 30 June 2025 and its financial performance and cash flows for the year then ended in accordance with New Zealand Equivalents to International Financial Reporting Standards and International Financial Reporting Standards.

This report is made solely to the Company's shareholders, as a body. Our audit has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

We are independent of the Company in accordance with Professional and Ethical Standard 1 International Code of Ethics for Assurance Practitioners (including International Independence Standards) (New Zealand) issued by the New Zealand Auditing and Assurance Standards Board, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Ernst & Young provides remuneration advisory services to the Company. Partners and employees of our firm may deal with the Company on normal terms within the ordinary course of trading activities of the business of the Company. We have no other relationship with, or interest in, the Company.

Key audit matter

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current year. The matter was addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, but we do not provide a separate opinion on this matter. For the matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the financial statements* section of the audit report, including in relation to this matter. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying financial statements.

Contract and Auction Revenue

Why significant

The Company has reported contract revenue of \$80.0m and auction revenue of \$33.9m in the year ended 30 June 2025.

Contract revenue is recognised when the wool is released to the customer, and so the right to consideration becomes unconditional, which can depend on shipment terms. Auction revenue is recognised when the auction is completed.

The timing and terms of shipment, the release of wool to customers and auction dates each impact the appropriate timing of revenue recognition.

Substantial revenue transactions occur close to year end which could result in revenue being recognised in the incorrect year.

Disclosures relating to revenue are included in note 1 to the financial statements and the policies related to revenue recognition are included in note (k) of the statement of accounting policies.

How our audit addressed the key audit matter

Our procedures in relation to contract and auction revenues included:

- Obtaining an understanding of the processes and key controls in relation to recognising revenue.
- Considering the revenue recognition policy applied by the Company and assessing its compliance with NZ IFRS 15 Revenue from Contracts with Customers.
- Analysing the correlation between the Company's recorded revenue, accounts receivable and cash using data analysis techniques.
- ► Testing a sample of revenue transactions recorded close to balance date to documentation supporting either the wool delivery terms and timing or when the auction was completed, to assess whether revenue had been recorded in the appropriate period.
- Assessing credit memos issued post balance date to consider whether related revenue was correctly recorded.

We also assessed the appropriateness and sufficiency of the disclosures relating to contract and auction revenue.

Information other than the financial statements and auditor's report

The directors of the Company are responsible for the other information. The other information comprises the annual report, but does not include the financial statements and our auditor's report thereon. The other information is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and, if uncorrected, to take appropriate action to bring the matter to the attention of users for whom our auditor's report was prepared.

Directors' responsibilities for the financial statements

The directors are responsible, on behalf of the entity, for the preparation and fair presentation of the financial statements in accordance with New Zealand Equivalents to International Financial Reporting Standards and International Financial Reporting Standards, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing on behalf of the entity the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and

using the going concern basis of accounting unless the directors either intend to liquidate the Company or cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing (New Zealand) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of the auditor's responsibilities for the audit of the financial statements is located at the External Reporting Board's website: https://www.xrb.govt.nz/standards/assurance-standards/auditors-responsibilities/audit-report-2/. This description forms part of our auditor's report.

The engagement partner on the audit resulting in this independent auditor's report is Brendan Summerfield.
